DEVICES CONTROL SOLUTION

FACILITIES UPGRADE

Some projects requires classroom upgrade to be multimedia and centralized devices control classrooms but with limited budgets.

OVERVIEW

- Replace VGA outputs to HD and upgrade all classrooms to be central control classrooms.
- All devices can be controlled by **KZ-VRC**, including projector and big touch screen power control. Also, **KZ-VRC** should be attached on the existed lectern or a touch screen stand.
- Installed controllers can be controlled and managed through network in the future.

E-PODIUM RETROFIT

Replace the old controller inside of the E-Podium to be an up-to-date teaching facility. Thanks to **KZ-VRC**, HD inputs and outputs, devices control, and signals switch can be practiced during teaching activities or conferences.

MAKE THE BEST USE

The existed lecterns can be upgraded to be a all-in-one facilities which makes teaching much easier, more efficient, and more cost-effective.

VARIOUS INSTALLATIONS

Attached onto the touch screen stand, KZ-VRC can control the power of the touch screen and the computer inside the cabinet. Teachers can easily operate and ensure the security of devices in the classroom.

FLEXABLE COMBINATIONS

Based on requirements of projects, KZ-VRC can be combined with a 7" touch panel (KZ-M7300A or KZ-M7300AI) to edit and configure different devices control in different classrooms or conference rooms.

ALL-IN-ONE MULTI-FUNCTIONAL CONTROL

In most projects, an modern podium is required for various occasions, such as, teaching, training, and meetings to practice effective and convenient operations to control devices in a room.

OVERVIEW

- a modern-designed podium to replace the old one.
- The control software can be programmable and configured independently to meet different requirements.
- All devices can be controlled by the new podium, including the computer, projector and big touch screen power control. .
- The new podium can be controlled and managed through network in the future.

ENHANCE PERFORMANCE

Taking advantage of KZ-6800 enhances the performance during a teaching activity, presentation, and training program. Lecturers can easily switch inputs from different devices, control the power of PC, projector or TV Screen, operations of electric projection screen etc. It is easy to extend the functionalities of devices control in the future.

LIGHTS CONTROL

To further control lights in the room, **KZ-6800** can be combined with **KZ-SP8** to practice lights control. 7" touch panel attached onto the podium can turn on/off the lights accordingly.

MORE DEVICES CONTROL

If there are more devices required centralized control, **KZ-PCI8X** can handle this requirement. Connected to **KZ-PCI8X**, **KZ-6800** can turn on/off devices one by one to prevent overcurrent.

MAIN PRODUCTS

KZ-VRC

HD NETWORK CONTROLLER

A compact controller that combines HD display, signal switch, audio output, power supply of PC and projector, and the operation of electric projection screen.
